PROFIT

CAL-C-GOLD is a meticulously formulated chelated calcium suspension designed to address calcium and phosphorus deficiencies in cattle. With a potent blend of essential vitamins, minerals, and nutrients, this suspension ensures optimal absorption for enhanced milk production. The unique composition of CAL-C-GOLD includes key ingredients such as Satavari, Jeevanthi, and Jatamansi, contributing to the overall health and well-being of the animals.

This supplement is particularly beneficial for cattle during periods of calcium and phosphorus deficiencies, aiding in the replenishment of calcium lost through milk. The precise dosage recommendations for different animal categories ensure effective results, and the product is available in various pack sizes to suit different needs.
